Professional Summary

Full Stack Developer with hands-on experience across ERP support, process analysis and web application development. Works across business context, user needs and technical execution to deliver maintainable solutions using Java, JavaScript, AngularJS, SQL, PostgreSQL, REST APIs and Git. Experience includes ERP feature delivery, JasperReports customisation, incident investigation, functional documentation and user training. Also building LeafDfE, a tax SaaS platform focused on centralising NF-e, CT-e and MDF-e workflows in a web-based multi-company operation.

Experience

Softland Sistemas

Jul 2024 - Present

Mid-level Process & Support Analyst

Sao Paulo, Brazil

- Provide technical and operational support for ERP environments, investigating incidents and assisting clients in critical routines.
- Analyse business processes, prepare functional documentation and gather requirements for improvements and new requests.
- Support feature evolution and client digitalisation initiatives, connecting business needs with technical execution.
- Assist with validation, behaviour checks and workflow organisation to reduce operational rework.
- Stack: Java, JavaScript, SQL, PostgreSQL, ERP, REST APIs, functional documentation.

Softland Sistemas

Dec 2022 - Aug 2024

Junior Process & Support Analyst

Sao Paulo, Brazil

- Supported ERP users with configuration, troubleshooting and day-to-day operational issues across different client profiles.
- Used SQL and data analysis to investigate failures, correct process flows and reduce rework.
- Delivered software training and acted as a bridge between operations, end users and the technical team.
- Followed requests from a functional perspective, reproducing scenarios, refining requirements and supporting system adoption.
- Stack: SQL, PostgreSQL, ERP, technical support, process analysis, user training.

Softland Sistemas

Aug 2021 - Dec 2022

Software Development Intern

Sao Paulo, Brazil

- Developed a CSV export feature for the ERP platform, connecting business rules, user interface and data structures.
- Customised reports and printed outputs in JasperReports based on client functional requirements.
- Worked daily with Git, PostgreSQL, APIs and agile practices in a corporate development environment.
- Contributed to product maintenance and incremental improvements across code, database and functional validation.
- Stack: Java, JavaScript, AngularJS, PostgreSQL, JasperReports, Git, REST APIs.

Ramos Solucoes ERP

Jan 2019 - Jul 2019

Development Intern

Sao Paulo, Brazil

- Built websites and no-code applications with focus on fast delivery and business fit.
- Worked with Bubble.io, HTML, CSS and JavaScript to build interfaces and process flows.
- Developed a practical foundation in web development, problem solving and direct client interaction.
- Supported early-stage screen design, workflow structuring and delivery validation aligned with operational needs.
- Stack: Bubble.io, HTML, CSS, JavaScript, no-code, web interfaces.

Selected Projects

LeafDFe - Tax SaaS and REST API	2026
- Personal project focused on tax operations for accounting firms and companies, built as a fully web-based multi-company platform. - Centralises NF-e, CT-e and MDF-e documents in a web dashboard with batch manifestation, document lookup and XML/DANFE download. - Built with Next.js 16, React 19 and TypeScript, using Prisma with SQLite and PostgreSQL schemas. - Uses Clerk for authentication, Upstash Redis for rate limiting and cache, Cloudflare R2 for XML storage, and AbacatePay for primary checkout. - Structured around App Router, UI/dashboard components, auth, billing, audit and integration layers, plus domain services for SEFAZ workflows. - Covered by Vitest for critical checkout and webhook flows, supported by operational documentation, changelog and release/deploy validation. - Stack: Next.js, React, TypeScript, Prisma, Clerk, Redis, Cloudflare R2, AbacatePay, Vitest, Vercel, Shell.	

CSV Export for ERP - Java, AngularJS and PostgreSQL	2022
- Delivered a CSV export feature for an ERP platform. - Worked across business rules, backend, interface and database layers in a corporate environment. - Built with focus on usability, operational productivity and long-term maintainability. - Considered output format, data consistency and day-to-day client needs in ERP usage. - Stack: Java, JavaScript, AngularJS, PostgreSQL, Git.	

ERP Reports - JasperReports and SQL	2021 - 2024
- Customised ERP reports and printed outputs for different operational workflows. - Adjusted layout, filters and data structure to support reconciliation, reporting and decision-making. - Worked close to client processes to ensure functional fit and clear outputs. - Combined business rule analysis, data querying and practical report design. - Stack: JasperReports, SQL, PostgreSQL, ERP, functional documentation.	

Education

Sao Judas Tadeu University	Aug 2024 - Dec 2028
<i>BSc in Business Administration (ongoing)</i>	<i>Sao Paulo, Brazil</i>
Sao Judas Tadeu University	Aug 2024 - Dec 2028
<i>BSc in Information Systems (ongoing)</i>	<i>Sao Paulo, Brazil</i>
Trybe	2021 - 2022
<i>Technical Programme in Software Development</i>	<i>Remote</i>
ETEC de Francisco Morato	2017 - 2019
<i>High School and Technical Diploma in IT</i>	<i>Francisco Morato, Brazil</i>

Skills

Languages: Portuguese (Native) English (Professional) Italian (Basic)	
Technologies: TypeScript, JavaScript, Python, Shell, Java, Next.js 16, React 19, Node.js, AngularJS, SQL, PostgreSQL, HTML, CSS, MongoDB	
Tools: Git, GitHub, Prisma, Clerk, Upstash Redis, Cloudflare R2, AbacatePay, Vitest, Vercel, JasperReports, Bubble.io, REST APIs	
Practices: semantic versioning, semantic commits, troubleshooting, process analysis, requirements gathering, functional documentation
